

2. The chapter on *Calcutta Medical Institutions* is new, the subject having hitherto been dealt with in a separate annual report. The increase in their number from 15 to 17 is due to the inclusion in 1900 of the Municipal and Dockyard dispensaries at Kidderpore. The out-patients for each of the three years numbered 219,302, 251,822, and 253,615, respectively, giving an average of 241,579, against 235,706 in the preceding triennium. The year 1900 was unhealthy, with a death-rate of 43.32 per mile, but in 1901 the increase of attendance was still maintained, although the general health had much improved. There was a considerable decrease of indoor patients, but the number of out-patients was kept up by the increased attendance of persons suffering from minor illnesses. This is an indication of the increasing popularity of the outdoor departments of the hospitals, of which the Medical College Hospital was the most conspicuous. The Inspector-General mentions three hospitals where the outdoor attendance fell off in 1901, and there seem to have been defects in the management, about which enquiries will be made.

The number of indoor patients was highest in 1900, owing to the unhealthy conditions of the year. In 1901 there was a decrease from 28,372 to 25,989. There is a considerable disproportion between the number of beds available and the requirements in the different hospitals. In the Campbell Hospital there are 752 beds, of which 428 were occupied on an average, and in the Presidency General Hospital there are 234, of which 154 were occupied. There were on an average 600 unoccupied beds in the different institutions. The popularity of the Sambhu Nath Pandit Hospital resulted in overcrowding both in 1900 and 1901, and further accommodation is being provided. The Dufferin Victoria Hospital in 1901 increased its number of patients from 158 to 382.

The rate of mortality among patients was 14.60, 17.57, and 15.70 in the three years. A disproportionately high ratio is returned every year from the Campbell and Howrah General Hospitals, but the Inspector-General is satisfied that this is due to the large proportion of moribund patients admitted into these institutions.

3. It is with satisfaction that the Lieutenant-Governor observes the restoration of public confidence in the hospitals which the plague scare in 1898 had seriously impaired. Evidence of this is given by the increase in the number of women and children treated from 39,706 and 47,977 in 1898 to 49,095 and 60,130, respectively, in 1901, and by the steady increase in the number of patients treated for local diseases and injuries, whose attendance is unaffected by the prevailing health conditions of the year.

4. In paragraph 18 of his report the Inspector-General gives some account of the diseases most prevalent during the triennium. There was a decrease in 1901 of malarial fever and dysentery cases. Cholera was epidemic in 1900 and small-pox in 1901. It is noticeable that disorders due to poisoning have steadily increased, and some inquiries are desirable on the subject. Explanation is needed of the considerable increase of tuberculous diseases and cases of cerebro-spinal fever, which are noticeable features of the period under report.

5. The nursing work at the principal hospitals receives favourable mention. The question of placing the nursing organisation on a more systematised footing, with the view of obtaining wider support from the public, is receiving the attention of Government.

6. *Charitable Dispensaries.*—The total number of dispensaries, outside Calcutta, on the Government list was 492 at the opening of the period under review and 558 at its close. The rate of increase during the preceding triennium has thus been more than maintained, and 128 new dispensaries have been opened in the last six years. The Inspector-General remarks that Bengal is behind other provinces in the number of such institutions in proportion to its population, and refers to his previous suggestion that there should be a dispensary at every thana and in every town or rural area with a population of 3,000 persons. The Lieutenant-Governor is of opinion that the progress made in recent years has, on the whole, been satisfactory. It is true that the existing dispensaries serve a larger area than in other provinces, and that the average attendance at each is lower than in any other province

except Bombay. This the Inspector-General attributes partly to the fact that the proportion of rural to urban population is greater in Bengal than in other parts in India. But a more potent reason, as has on former occasions been pointed out, is the fact that the medical demands of the Province are to a large extent met by the native practitioners, who are to be found in every town or large village, and who do a great deal of free work for the poor. During the last five years the outturn of qualified practitioners from the medical schools of Bengal was three times that of the medical schools of Bombay and the Panjab. It does not appear that much has been done to carry out the proposals to supply medicine-chests to village headmen, or to arrange for visits by dispensary officers to neighbouring markets, and the report contains so little information on these subjects that the Lieutenant-Governor invites the Inspector-General to give him more details as to the areas in which the experiment has succeeded. The plan was well meant, and experience may give useful suggestions.

Not only are dispensaries more numerous, but the number of patients treated has increased in a more than corresponding ratio. The total number of patients treated during the three years was 10,470,463, against 8,398,567 in the preceding triennium, showing a ratio per cent. of population of 4.72 against 3.95. During 1901 the percentage of population treated rose to 5.02. The chief increase was in outdoor patients, as in Calcutta, which is a proof that the attention to small amenities, and the respect to class and caste prejudices, which Colonel Hendley has assiduously inculcated, have resulted in an undoubted growth of popularity. This is also proved by the increased attendance of women and children by 28 and 31 per cent., respectively, over the numbers in 1897. As is natural, charitable relief is much more sought in urban than in rural areas. Some remarkable variations are, however, shown; the percentage of patients to population being as high as 351.13 in Noakhali and as low as 11.46 in Khardaha and 16.75 in Puri. The Inspector-General is making inquiries into the causes of these low returns, but it will probably be found due to the different methods of calculating the population served by the dispensaries.

The number of indoor patients increases slowly, and the daily average rose from 1,976 in 1899 to 2,177 in 1901. The number of beds available rose from 3,436 to 3,628. Attempts are being made to make the indoor wards more popular by providing separate quarters for pauper and moribund patients, and this has been done in 22 dispensaries. The Inspector-General attributes the increased attendance in certain institutions to improvements in administration and management, and the Lieutenant-Governor will gladly help to make these more general. The death-rate of 1901 was considerably lower than that of the preceding years—a result also attributed to improved management. There has been some increase of surgical work, but this is clearly capable of expansion. Credit is due to the officers whose names are specially mentioned in the report.

It is unsatisfactory to find that Civil Surgeons have been less active in inspections during the past year, and Government awaits the report on the subject which the Inspector-General proposes to furnish after taking the explanations of the officers in default.

7. The number of dispensaries managed by local bodies has considerably increased, the most noticeable feature being the rapid growth from 157 in 1898 to 205 in 1901 of institutions under the management of District Boards. The Lieutenant-Governor is pleased to see that the complaint made in the last triennial report of lack of interest on the part of local authorities is not repeated. The income contributed by local funds to medical institutions, which in 1898 was about  $4\frac{1}{4}$  lakhs, amounted in 1901 to over  $5\frac{3}{4}$  lakhs. In the matter of management, moreover, an improvement has been effected by placing every dispensary, where possible, under a committee, representative not only of the controlling local authority, but also of the general public. This policy has been generally carried out, though the Inspector-General mentions certain places which for no apparent reason are still backward in this matter. In some cases the Committees have not worked well, and it is hoped that Commissioners and District Magistrates will use their local influence to remedy such defects as have been noticed.

8. The main object of appointing Committees is to interest the public in the good management of the dispensaries and to increase subscriptions. The financial results of the triennium show that this arrangement has been to some extent successful. Of the total income of dispensaries, excluding the Calcutta institutions, which for the three years averaged Rs. 11,23,534, an average amount of Rs. 2,90,022, or 25·7 per cent., accrued from subscriptions, which now amount to over 3 lakhs, against 2½ lakhs in the preceding triennium. In addition to the subscriptions many special donations were received, which are not included in the returns. The Lieutenant-Governor fully concurs in Colonel Hendley's appreciation of these individual gifts, but he agrees with him that there should be a larger number of regular subscribers among all classes. This is particularly the case in Calcutta, where the average amount of subscriptions during the triennium was Rs. 14,486, or only a little over 1 per cent. of the average income, of which sum over Rs. 12,000 was subscribed by Europeans. Receipts from the native community, the Lieutenant-Governor regrets to observe, annually diminish. He is constrained to share Colonel Hendley's opinion that the income derived from charity is not worthy of the capital of India. Government contributed nearly 74 per cent. of the whole income of the Calcutta medical institutions. In the mufassal nearly 50 per cent. of the cost is borne by local funds, the income from which, as already indicated, shows a satisfactory increase. The average contribution from Government amounted to Rs. 1,15,140, or about 10 per cent. of the total income.

9. The expenditure on dispensaries has increased from Rs. 8,69,400 in 1898 to Rs. 10,40,168 in 1901. The increase is due mainly to the addition of new dispensaries and to the higher rate of contribution to the pay of Civil Assistant Surgeons, while additional miscellaneous expenditure was incurred on improvements in furniture and other matters intended to render the dispensaries more comfortable and attractive. The cash balance rose from Rs. 45,000 in 1898 to Rs. 1,41,485 in 1901. It is not clear why this balance, which in 13 per cent. of the total expenditure, should be so large. The investments of dispensaries increased during the three years by over 2½ lakhs. In Calcutta the charges were largely increased by heavy expenditure in each year on buildings, particularly in connection with the Medical College Hospital and the Presidency General Hospital. The opening of the new block in the latter Hospital, the additions to the staff, and other improvements have supplied a much-felt want.

10. The period covered by the review was one of considerable administrative progress. Among the reforms effected is the improvement in the position and prospects of the Subordinate Medical Service, which the Inspector-General confidently anticipates will have an important bearing on the working of hospitals and dispensaries. Among other innovations are the transfer of the control of Medical Education from the Director of Public Instruction to the Inspector-General of Civil Hospitals, the training of Civil Hospital Assistants in practical pathology and medico-legal work, and the abolition of the civil store of medicines maintained at district and subdivisional headquarters for Government servants.

11. The inspection work done by Colonel Hendley, and by Colonel McConaghey in the eight months during which he officiated as Inspector-General, was full and sufficient. The thanks of the Lieutenant-Governor are due to both, and especially to Colonel Hendley for his able administration of the Department. His report is a record of substantial and continuous progress.

By order of the Lieutenant-Governor of Bengal,

E. W. COLLIN,  
*Offg. Secretary to the Govt. of Bengal.*

RESOLUTION ON THE REPORTS ON INLAND EMIGRATION FOR THE  
YEAR 1901.

GENERAL DEPARTMENT—EMIGRATION.

Darjeeling, the 15th July 1902.

RESOLUTION—No. 1108T.—G.

READ—

The Report of the Superintendent of Emigration, Calcutta, on Inland Emigration for the year 1901.

Read also—

The letters from the (1) Commissioner of the Bhagalpur Division, No. 729J., dated the 14th May, and No. 770J., dated the 28th May 1902, and (2) Commissioner of the Chota Nagpur Division, No. 249J., dated 26th May 1902, forwarding with their remarks the reports of the Superintendents of Emigration in their respective Divisions.

1. The year 1901 was important from the changes in the administration of inland emigration. The new Act, which consolidated and amended the law relating to emigration to the labour districts of Assam, came into force on the 9th March 1901, repealing Act I of 1882 and Act I (B.C.) of 1889; the changes made in the law were reviewed in this Government's Resolution No. 2153, dated the 3rd May 1901. A revised set of rules under the new Act was published for general information in the *Calcutta Gazette* of the 16th October 1901 under Notification No. 3412, dated the 15th idem.

2. The Superintendent of Emigration, Calcutta, has stated at length the action taken by Government to ensure the proper working of the new Act.

Arrangements for the working of the Act. Five Superintendents of Emigration have been appointed for the following local areas, viz., (1) Ranchi and Palamau, (2) Singhbhum and Manbhumi, (3) Hazaribagh, (4) the Sonthal Parganas, and (5) the remaining districts of Bengal. Since the close of the year a Travelling Superintendent has been appointed for Bengal and the Central Provinces. A whole-time officer was appointed Superintendent of Emigration and Registering Officer at Ranchi during the latter part of the year for the four busy months of the year, viz., December 1901 to March 1902.

In this Resolution the reports received from the Superintendent of Emigration in Calcutta as well as of the local Superintendents are reviewed.

3. For the first portion of the year emigrants were recruited as in former years—(i) by licensed contractors and recruiters, (ii) by special local agents, (iii) by garden sardars, and (iv) went to the labour districts as "free emigrants." The special local agents system of section 62 of Act I of 1882 ceased to exist with the introduction of Act VI of 1901; and a new system of recruitment by specially-employed garden sardars under Chapter V, section 90 of the new Act became legal from the 15th July 1901 in the districts of Manbhumi, Hazaribagh, and the Sonthal Parganas.

4. Altogether 30,777 emigrants were despatched to the labour districts as against 65,190 in the previous year; 27,250 embarked at Goalundo and 3,527 at Jatrapur; Assam received 21,663, Cachar 2,596, and Sylhet 2,991 as against 46,635, 6,838, and 11,717 respectively in 1900. The great diminution is partly explained by the fact that the year 1900 was a famine year in Chota Nagpur, and is also ascribed by the Commissioner of that Division to wild stories having been circulated exaggerating the responsibilities incurred by garden sardars under the new Act. There is a further and, to the planter, more serious reason. Coal-mines in Bengal have increased rapidly of late both in number and in size, and the mine-owner is now a formidable competitor

with the tea-planter in the districts of labour-supply. He gives higher wages, and the mines have at least the attraction of being nearer the districts of recruitment.

5. Adding to the number of contractors, recruiters, and agents returned by the Superintendent of Emigration, Calcutta,

Recruiting agencies.

the numbers reported by the local Superintendents, it would appear that there were at work during the year 13 contractors with 10 sub-contractors, 161 licensed recruiters, 24 special local agents who were licensed under the old Act, I of 1882, and continued to work until their licenses expired, and 37 local agents, as compared with 2 contractors, with 16 licensed recruiters, 17 special local agents, and 11 local agents in the preceding year. It may be, however, that individuals were licensed as contractors in more than one area, and that some have therefore been *twice* counted.

The increase in the number of recruiters' licenses is considered by Dr. Forsyth to be indicative of the good effect of the warning given to contractors not to avail themselves of the services of unlicensed recruiters.

The number of garden sardars and sardarnis at work in the recruiting districts fell from 4,045 in 1900 to 3,902 in 1901. During the latter part of the year 17 garden sardars with special permits under Chapter V of the new Act were sent to the Chota Nagpur Division, but they despatched no emigrants before the close of the year.

6. Of the 30,777 emigrants despatched to the labour districts, 11,631, or 34 per cent., as against 40 per cent. in 1900 went as free emigrants; 6 per cent. as against 2 per cent. in 1900 were recruited by the licensed contractors; and 7 per cent. as against 12 per cent. in 1900 by the special local agents; garden sardars recruited 15,041 emigrants, or 48 per cent. of the whole number, as compared with 29,493, or 45 per cent., in the previous year. The districts in Bengal outside the Chota Nagpur Division and the Sonthal Parganas contributed only 2,278 of the registered emigrants. The great decrease in the number of "free" emigrants, who numbered 26,300 in 1900, is attributed by the Superintendent of Emigration, Calcutta, to the prohibition of recruiting otherwise than under Chapters III and IV of the Act in the districts of the Chota Nagpur Division, the Sonthal Parganas, and in the Central Provinces, but is no doubt also due to the abolition of registration at Dhubri.

According to the reports of the Superintendents of Emigration, only 5,894 labour contracts were executed during the year, but it is possible that there has been some mistake in the figures furnished, as out of the total number of emigrants despatched to the labour districts, 19,146, including dependants, were registered under the Act. The Superintendent of Emigration, Calcutta, will be asked to explain, in consultation with the other Superintendents, this apparent discrepancy.

7. Between recruitment and embarkation 255 casualties were ascertained, of which 7 only were deaths, as against 132 deaths in the preceding year. The reduction in the number of casualties on the river journey was very marked, being only 36, or .11 per cent., as against 227, or .34 per cent., in 1900. The deaths on the river journey were 26, or .08 per cent., as against 214, or .32 per cent., in the previous year.

This result was due to the careful measures adopted for the well-being of the emigrants in transit. Special care was taken by the official who inspected the dépôts, places of accommodation, and rest-houses to see that they were kept clean and well ventilated; that the food and water-supply for drinking, culinary, and ablution purposes were good and sufficient; and that the accommodation and latrine arrangements were satisfactory. Vaccination was carefully and efficiently performed. In all the districts the health of the recruits was good, and there was no epidemic among them of any kind either in the dépôts or on the river journey.

8. Special measures were taken to ensure the proper working of sections 33 and 34 of Act VI of 1901, which require registration of emigrants in the district of recruitment. On its being reported that persons acting ostensibly

Measures taken to ensure the registration of emigrants in the district of recruitment.

under section 92 of the Act were sending coolies to licensed recruiters in other districts who registered and put them under contract, contractors were warned that their recruiters must communicate direct with emigrants from the first without the intervention of any third party. They are not prohibited from recruiting within the local areas for which they are licensed emigrants residing elsewhere who come to such areas of their own accord, but they are not permitted to employ intermediaries to bring emigrants to them from other local areas. It was pointed out to contractors that if they make use of such assistance, their licenses and those of their recruiters are liable to be cancelled.

In all districts enquiries were made by the registering officers before registration of non-resident emigrants, and in some cases registration was refused. Before registration of single women is allowed, statements of the recruiter and of other emigrants of the party are recorded. Of the 1,907 emigrants registered by contractors, the largest number, viz., 1,347, or 70 per cent., were again registered in the 24-Parganas. In spite of the precautions taken to have registrations effected in the districts of recruitment, only a small proportion of the emigrants registered in the 24-Parganas and at Raniganj were residents of those districts; and the registration of non-resident emigrants at Calcutta, Howrah, and Raniganj still requires careful attention,

9. The Lieutenant-Governor is glad to observe that licenses were granted Measures adopted for stopping un- after careful enquiry by the Superintendents of controlled professional recruiting. Emigration. In Manbhum and Singhbhum a list of licensed contractors and recruiters was communicated to each police thana and outpost. The police were also ordered to instruct the village chaukidars at the weekly parades to see that no person without a recruiter's license is permitted to do any recruiting; and the Emigration Officer at Purulia and the Government Railway Police were ordered to watch the trains and other routes so that no free coolies may be despatched by rail or otherwise except in accordance with the rules made under the Act.

In order to check unlicensed recruiting in the Sonthal Parganas, the Commissioner of Bhagalpur has directed that a list of the licensed recruiters be sent to all thanas, parganaits, and other leading persons once in six months, so that it may be known who are licensed to recruit, and that information may be given about unlicensed recruiters.

Several cases of infringement of rules having been reported by the Emigration Officers at Katihar, Goalundo, and Jatrapur in respect of railway coolies, the provisions of the law were pointed out to the Agent, Assam-Bengal Railway, and he was requested to instruct the railway contractors and labour agents to build and maintain properly-equipped rest-houses at the several halting places on the emigration routes.

10. On the whole it may be said that the year was one of transition to a state of more complete supervision and control of recruitment in those districts, viz, the Sonthal Parganas and the districts of Chota Nagpur, in which past experience has shown increased supervision to be necessary in order to prevent abuses of recruiting among simple and ignorant people.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

*Offg. Secretary to the Govt. of Bengal.*

**RESOLUTION ON THE ANNUAL REPORT ON THE REFORMATORY SCHOOLS  
AT ALIPORE AND HAZARIBAGH FOR THE YEAR 1901.**

GENERAL DEPARTMENT—EDUCATION.

*Darjeeling, the 16th July 1902.*

RESOLUTION—No. 1382T.—G.

**READ—**

The Annual Report on the Reformatory Schools at Alipore and Hazaribagh for the year 1901.

The Annual Report on the Reformatory Schools at Alipore and Hazaribagh has this year been curtailed in accordance with the instructions issued. The Lieutenant-Governor has no objection to the maximum length of the report being fixed at six instead of four pages.

This is the second year of the working of the two Schools under the Education Department.

2. *Admissions.*—It is satisfactory to observe that the number of admissions fell from 128 in 1900 to 120 in 1901, but the number is still large as compared with the admissions in 1898 and 1899. The Boards of Management, as desired in last year's Resolution, examined the admissions for 1900 to ascertain whether any of the boys could not be more suitably dealt with under the provisions for youthful offenders. The result of this examination led to the release of 4 boys from the Hazaribagh School. The Lieutenant Governor requests that the Boards of Management will continue to carefully scrutinise all admissions, and report to Government any cases of boys who, in their opinion, could have been more suitably discharged on probation of good conduct under section 562 of the Criminal Procedure Code or after due admonition under section 31 of the Reformatories Act of 1897. It has been ascertained from the judicial returns for the year that 256 offenders, probably in most cases juvenile, were dealt with during the year under section 562 of the Criminal Procedure Code, and 44 were discharged after admonition or were delivered to parents and guardians under section 31 of Act VIII of 1897. With reference to the Director's remark that the Board of Management of the Alipore School are of opinion that it is not desirable to send boys to a Reformatory on first conviction, or boys below ten years of age, it must be pointed out that the Lieutenant-Governor has decided that no such absolute instructions can properly be issued to the Courts.

3. *Health, Discipline, and Education.*—The health of the boys in both Schools was good; the admissions to hospital in the Hazaribagh School showed a slight increase. Punishments were more frequent in the Alipore School than at Hazaribagh, and discipline appears not to be so good in the former School. Satisfactory progress has been made in both Schools in elementary education; drill and gymnastics are included in the training, and games are played.

4. *Industries.*—In accordance with the system inaugurated last year of concentrating, as far as possible, boys of agricultural castes at Hazaribagh and those of industrial castes at Alipore, 41 boys were regularly employed at Hazaribagh on cultivation and 21 boys on market-gardening, but at certain seasons of the year nearly all the boys were employed on agricultural work. These arrangements are in accordance with the Lieutenant-Governor's orders, but there has been great delay in giving effect to them in the Hazaribagh School. In the Resolution of 13th September the teaching of market-gardening was enjoined. A cultivator to teach market-gardening was not got till June 1901, and then was badly selected and was a failure. Government has not been able to approve the proposal of the Hazaribagh Board of Management to engage a gardener from Saharanpore. The object is not to teach the boys floriculture and horticulture, but to make them expert market-gardeners, and for this purpose a good market-gardener of the Koeri caste from the neighbourhood or from Bankipore is to be preferred to a Saharanpore gardener.

There was a considerable decrease at both Schools in the profits from manufactures. This was fully anticipated in the orders passed on the reports

for 1899 and 1900, when it was directed that industries should be taught to the boys, preferably the trades of their castes which would be useful to them in after life. Local conditions may vary, however, and it is the duty of the Boards of Management to look out for openings for the boys. It was stated in last year's Resolution that the Lieutenant-Governor took no exception to the diminution of profits from industries. He desires to say again emphatically that such a diminution of profits should not be weighed against the reform which he has enjoined; and he regrets to notice that the Board of Management and the Superintendent at Alipore did nothing during the year to carry out a reform which he has had much at heart. Seventy-two boys were taught carpentry at Alipore in 1901, against 60 in 1900; 19 were taught tinsmithing, against 8; and 48 were taught book-binding, against 40. It is certain that there was no such increase in the number of lads, who are carpenters and bookbinders by caste, and that boys of those castes did not reach anything like the numbers taught these trades. Were these boys taught the trades that would be likely to be useful to them when they left the School? From page 4 of the report it appears that out of 125 boys released from Alipore in the years 1898 to 1900, only 13 are now following the trades taught to them in the School. The figures above cited for the year under review show that this ill-success is likely to be aggravated, and the Lieutenant-Governor again calls the very special attention of the Director and of the Board of Management to the subject.

5. *Licensing.*—In last year's report it was stated that the Board of Management, Alipore, had taken no action in the important matter of licensing boys out. The Lieutenant-Governor is therefore pleased to learn that during the year under review 5 boys from the Alipore School were licensed out for work in the Upper Hooghly Mills, and that there is a probability of the system being extended. It is not stated whether these boys were wanted for carpentry or for weaving, and the presence of this opening for employment accentuates the apparent absence of any arrangement to prepare lads for it. The Lieutenant-Governor is gratified to learn that during the year under review 34 boys as against 12 last year were licensed out from the Hazaribagh School, and he congratulates the Board on the intelligence and care with which they have ordered the arrangements of the School. When, as apparently at Hazaribagh, an exhaustless field is opened out for employment in mining, carpentry, and blacksmith's work, it is quite a matter for the Board's consideration, if they are satisfied as to the stability of the opening, to prepare more directly for it. It is true that this would be a divergence from the plan, by which the Hazaribagh School was to be a school for agriculture. But the whole object of the Schools is to fit the lads to earn an honest livelihood; and if local conditions give a really valuable opening to that end in other directions, the Lieutenant-Governor has no objection whatever to deviation from the general plan to utilize it. He trusts that the licensing system will become more popular. No corresponding advantage is to be gained by resort to the ancient apprenticeship system of 1850. By the apprentice system no wage, but only board, lodging, clothing, and instruction is secured for the boy. It is the direct aim of the School that the boy should go out instructed.

6. *Training of Boys.*—The efforts of the Educational Department to follow up the history of every boy for three years after his release were more successful during the year under review than in the previous year. The percentage of failure to trace out the boys after their release to the total number discharged in 1900 was 24 per cent. as against 34 and 33 per cent. in the years 1899 and 1898. The results are not, however, as satisfactory as the Lieutenant-Governor had hoped for. With an agency like the Educational Department, which commands the sympathy of the people at large, there should be no excuse for failure to trace out and account for nearly the whole number of boys released. The Lieutenant-Governor trusts that the procedure now adopted of releasing boys in the presence of an Educational officer may lead to better results, but success depends on the personal zeal and interest taken in the matter by the Educational officer himself.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

DISTRICT ROAD FUND ACCOUNTS FOR THE QUARTER ENDING 31st  
MARCH 1901.

No. 3518R.C.

Government of Bengal,

PUBLIC WORKS DEPARTMENT.

ROAD CESS.

*Dated Calcutta, the 18th July 1902.*

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 286A.C., dated the 7th July 1902, submitting statement of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 31st March 1902.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the fourth quarter of the year 1901-1902 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the statement of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the statement referred to, be forwarded, for information, to the Commissioners of the Rajshahi, Chittagong, Bhagalpur, and Chota Nagpur Divisions; Superintending Engineers of the Northern and Western Circles; Inspectors of Works, Eastern and Bhagalpur Circles, and to the Financial Department of this Government.

By order of the Lieutenant-Governor of Bengal,

W. A. INGLIS,

*Offg. Secretary to the Government of Bengal.*

W. H. MICHAEL,

Accountant-General, Bengal.

**WORKING OF THE FIRE-BRIGADE IN THE TOWN AND SUBURBS OF  
CALCUTTA AND IN THE MUNICIPALITY OF HOWRAH DURING THE  
YEAR 1901-1902.**

NOTIFICATION—No. 1454T.—M.

*The 18th July 1902.*—The following is published for general information.

E. W. COLLIN,  
*Offg. Secy. to the Govt. of Bengal.*

No. 8034, dated Calcutta, the 25th June 1902.

From—R. A. D'O. BIGNELL, Esq., Commissioner of Police, Calcutta,

To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit, in accordance with section 41, Act I of 1893, the following report on the working of the Fire Brigade in the Town and Suburbs of Calcutta and in Howrah during the year 1901-1902.

2. The force at the close of the year under review was as follows —

<i>Lall Bazar.</i>	<i>Howrah.</i>	<i>Bhowanipore.</i>
1 Superintendent.	1 Engineer.	2 Tindals.
1 Chief Engineer.	1 Native Driver.	12 Khalasis.
2 Assistant Engineers.	5 Tindals.	—
1 European Driver.	1 Fireman.	14
3 Tindals.	18 Khalasis.	—
2 Native Drivers.	3 Syces.	
1 Fireman.	—	
18 Khalasis.	29	
13 Syces.	—	
1 Inspector of Jute Ware-houses.		
—		
43		
—		
<i>Watgunge.</i>	<i>Chitpur.</i>	<i>Palmer's Bridge.</i>
2 Tindals.	1 Engineer.	2 Tindals.
12 Khalasis.	1 Native Driver.	12 Khalasis.
—	2 Tindals.	—
14	1 Fireman.	14
—	12 Khalasis.	—
	3 Syces.	
	—	
	20	
	—	

Hose Carts with 400 feet of hose are also kept at the Sukea's Street, Fenwick Bazar, Jora Bagan, Coomertolly and Alipore Police Stations for emergencies.

A statement showing the receipts and expenditure of the Fire Brigade is annexed to this report. The year opened with a balance of Rs. 19,750-3-11, the receipts amounted to Rs. 85,951-5-3. The total expenditure during the year amounted to Rs. 87,755-9-3, leaving a balance of Rs. 17,945-15-11 at the close of the year.

The increase of expenditure under the head "Establishment" is due to the pay of the khallas being raised from Rs. 7 to Rs. 8 under Government orders.

The savings under the head of contingencies is principally due to the fact that Rs. 2,300 worth of coal and clothing ordered during the year was undelivered, and therefore not paid for. There was also a saving of Rs. 900 from the sum budgeted for the purchase of hose, and Rs. 650 for the purchase of horses and Rs. 802 for the repair of the Howrah Fire Station, the total savings being Rs. 5,324-12-8.

Rupees 1,500 due to the Calcutta and Rs. 50 to the Manicktollah Municipalities for cost of collection, remained undisbursed at the close of the year, the total decrease under the head of "Other charges" being Rs. 1,663-14-2.

The receipts under the heads of "Hire of Fire Engine," "sale-proceeds of unserviceable hose" and "of horses" considerably improved, and these, together with the decrease already noted, are responsible for the large closing balance.

3. The following table gives the number of fires and the way they were dealt with :—

Description of fire.	Number of fires.	Number of fires attended by Fire Brigade.	Number of fires extinguished by residents.	Number of fires attended by Port Fire Engine.	REMARKS.
1	2	3	4	5	6
Fires at which property destroyed valued at Rs. 50 or more.	42	27	12	*8	* Fire Brigade also attended at these fires.
Fires at which property destroyed valued at less than Rs. 50.	82	16	64	+2	+ Steam Engine "Damooda" attended in one case.

4. Ten of these fires occurred in buildings licensed under Act I (B.C.) of 1893 and Act I of 1894, in which property to the total value of Rs. 6,37,400 was destroyed.

5. The total estimated value of property destroyed by fire was Rs. 9,17,632-8 against Rs. 8,80,265-10, the value of the property destroyed in 1900-1901.

6. No lives lost during the year at fires, but two of the European crew of the S. S. "Forth" that caught fire at the Hooghly Docks, Howrah, were severely burnt and had to be removed to hospital, where they recovered.

7. The following were the most serious fires :—

- (a) On the 3rd December 1901, a masonry building at Ghoosary, Howrah, containing cotton and machinery caught fire and burnt for seven hours and forty minutes. Estimated loss Rs. 80,000.
- (b) On the 22nd December 1901, five jute godowns containing jute caught fire at Sulkea, Howrah, and burnt for seven hours. Estimated loss Rs. 1,00,000.
- (c) On the 7th January 1902, a fire broke out at Watson's Patent Hydraulic Jute Press at Bag Bazar and lasted for two days and a half. Estimated loss Rs. 3,95,000.
- (d) On the 21st February 1902, the contents of masonry jute godowns in Chitpore caught fire and burnt for five hours and forty-five minutes. Estimated loss Rs. 9,300.
- (e) On the 24th February 1902, the S. S. "City of Bombay" laden with jute, cotton, gunny and rice, caught fire in the Kidderpore Docks; the fire lasted for 7 hours and 15 minutes. Loss estimated at Rs. 1,05,000.
- (f) On March 5th, 1902, a masonry jute godown on Dhurmahatta Street caught fire. Loss estimated at Rs. 1,500. Fire lasted for five and a half hours.
- (g) On the 7th March 1902, the flat "Debong" laden with jute caught fire in the Kidderpore Docks. The fire lasted for twenty-three hours. Estimated loss Rs. 1,40,000.
- (h) On the 27th March 1902, a masonry godown containing jute caught fire at Shibpore, Howrah, and burnt for thirteen hours and forty-five minutes. Estimated loss Rs. 50,000.

8. Four licenses were granted under section 36, Act I of 1893 for letting off fire-works, rockets, &c. None of the licenses were suspended under Section 37 of the Act.

9. Two prosecutions were instituted under Act IV of 1884 for manufacturing fireworks without licenses : in both cases the accused were convicted and fined.

## Statement showing the actual receipts and disbursements of the Fire Brigade Fund for the year ending 31st March 1902.

RECEIPTS.	Budget estimate for 1901-1902.	Actual receipts for 1901-1902.	Increase.	Decrease.	REMARKS.	PAYMENTS.	Budget estimate for 1901-1902.	Actual charges for 1901-1902.	Increase.	Decrease.	REMARKS.

R. BIGNELL,

Commissioner of Police.

CALCUTTA;

{  
The 25th June 1902.

WEATHER AND CROP REPORT.

*For the week ending on 21st July 1902.*

**Burdwan.**—Rainfall at Sadar 1·01, Kalna 0·66, Katwa 0·75, Raniganj 4·50. Weather cloudy. Ploughing continues. Transplantation going on in places. Fodder and water sufficient. Condition of cattle good. Common rice sells at 12 seers per rupee.

**Birbhum.**—Rainfall at Sadar 5·17, Rampur Hat 4·52. Weather unsettled. More rain wanted. Sugarcane promising. Fodder sufficient. Common rice sells at 12 seers per rupee.

**Bankura.**—Rainfall at Sadar 4·93. Vishnupur 1·95. Weather seasonable. Heavy showers on 20th and 21st morning. Transplantation going on well. Sugarcane growing well. Fodder and water sufficient. Common rice sells at 12½ seers per rupee.

**Midnapore.**—Rainfall at Sadar 1·90, Contai 3·52, Tamluk 1·95, Ghatal 3·04. More rain wanted in Tamluk and part of Sadar. Transplantation going on. Jute and *aus* doing well. Fodder and water sufficient. Weather rainy. Cattle disease reported from thana Binpur. Common rice sells as follows:—

	Srs. ch.
Sadar	... 12 8
Contai	... 12 8
Tamluk	... 11 12 } per rupee.
Ghatal	... 12 0

**Hooghly.**—Rainfall at Sadar 2·07, Serampore 0·92, Arambagh 0·52. Weeding of *aus*, sugarcane and jute progressing. Seedlings are suffering for want of rain. Common rice sells as follows:—

	Srs. ch.
Sadar	... 10 0
Serampore	... 10 9 } per rupee.
Arambagh	... 12 1½

**Howrah.**—Rainfall at Sadar 1·43, Ulubaria 0·66. Fall general from 15th to 18th. No fall was recorded at Uluberia on the remaining days of the week, but rain fell on all the days at Sadar. A little more rain wanted for the high lands. Agricultural prospects are generally promising. Lands are being prepared for transplantation, and weeding going on, on lands sown with paddy. No cattle-disease. Fodder and water sufficient. Common rice sells at 10½ seers at Sadar and at 11 seers at Ulubaria.

**24-Parganas.**—Rainfall at Sadar 1·09, Barasat 1·05, Basirhat 3·05, Diamond Harbour 3·47. Weather rainy and cool. State and prospect of standing crops good, but more rain is wanted in Barasat and Basirhat. Transplantation of *aman* still going on. Common rice sells at 12 seers per rupee; in Diamond Harbour at 10½ seers. Condition of cattle good. Supply of fodder and water sufficient.

**Nadia.**—Rainfall at Sadar 1·52, Ranaghat 2·20, Chuadanga 2·27, Meherpur 2·22, Kushtia 1·49. Prospects of standing crops good. Fodder and drinking water sufficient. Common rice sells as follows:—

	Srs. ch.
Sadar	... 12 0
Ranaghat	... 11 0
Chuadanga	... 11 0 } per rupee.
Meherpur	... 10 8
Kushtia	... 11 4

**Murshidabad.**—Rainfall at Sadar 3·96, Kandi 1·07, Jangipur 4·20, Lalbagh 6·74. Weather seasonable. Prospect of sugarcane and jute good. Transplantation of *aman* seedlings going on. State of *bhadoi* good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs. ch.
Sadar	... 10 12
Kandi	... 12 4 } per rupee.
Jangipur	... 11 8
Lalbagh	... 11 4

**Jessore.**—Rainfall at Sadar 2·06, Jhenida 2·38, Magura 2·03, Narail 0·84, Bangaon 1·82. Weather seasonable. Prospects of crops fair to good. Fodder and water sufficient. No cattle-disease. Common rice sells at 12 seers per rupee; at Narail at 10½.

DECLARATION OF STATE HOLIDAYS.

FINANCIAL DEPARTMENT—MISCELLANEOUS.

*Calcutta, the 28th July 1902.*

RESOLUTION—No. 3439 Mis.

READ—

The Resolution of this Government, No. 1624T.—F., dated 31st October 1901, on the subject of the holidays given in Government offices and the practice regarding their enjoyment by clerks and other servants of Government.

Read also—

A letter from the Government of India in the Home Department, No. 1799, dated 12th June 1902.

In paragraph 4 of the Resolution above cited, it was remarked that, under the orders of the Government of India, the State holidays declared by the Local Government by notification under section 25 of the Negotiable Instruments Act to be public holidays would be in future ordinarily confined to the 24th May, the birthday of Her late Majesty, and the 9th November, the birthday of His Majesty the King-Emperor, and that these days would be declared by notification in the *Calcutta Gazette* to be public holidays.

2. In their letter of the 12th June 1902, the Government of India direct, in modification of these orders, that in future years a State holiday shall be notified under the Negotiable Instruments Act on May 30th or such other date as may be appointed for the celebration of the King's birthday in India, and that no holiday shall be declared on May 24th or November 9th in future.

ORDER.—Ordered that a copy of these orders be forwarded to all Heads of Departments, Commissioners and District Magistrates (through Commissioners), and to the several Departments of the Secretariat for information and guidance.

Ordered, also, that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

E. W. COLLIN,

*Offg. Secretary to the Govt. of Bengal.*

REPORT UNDER SECTION 41 OF BENGAL ACT I OF 1893 ON THE  
WAREHOUSES IN CALCUTTA FOR THE YEAR 1901-1902.

NOTIFICATION—No. 1831M.

*The 22nd July 1902.*—The following report is published for general information.

E. W. COLLIN,  
*Cffg. Secy. to the Govt. of Bengal.*

No. 7090M., dated Calcutta, the 23rd June 1902.

From—The HON'BLE MR. R. T. GREER, I.C.S., Chairman of the Corporation of Calcutta,

To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit the following report under section 41 of Act I of 1893 (B.C.) of warehouses in Calcutta for the year 1901-1902.

2. The fees under section 10 of the aforesaid Act continued to be levied at 7½ per cent. on the annual valuation of warehouses.

3. The following statement gives the results of applications for licenses:—

APPLICATIONS						
Pending since last year.	Received during the year.	Total.	Nature of application.	Number sanctioned.	Number refused.	Number pending.
2	1	3	Jute	1	1	1*
6	57	63	Wood, &c.	60	2	1
—	—	—	...	—	—	—
8	58	66	...	61	3	2
—	—	—	...	—	—	—

\* Pending opinion of the Commissioner of Police.

4. Eight licenses issued for 1900-1901 and 569 for 1901-1902. The following is a statement of the aggregate amount of receipt:—

	Rs. A.
License fees for 1900-1901	... 402 8
Ditto 1901-1902	... 22,653 0
Mutation fees and fines, &c.	... 189 2
Total	<u>23,244 10</u>

5. Of 597 licenses for warehouses in 1900-1901, 539 were renewed and 17 were cancelled as vacant or unoccupied or not assessable under the Act, while the license fees of 41 remained unrealised at the close of the year.

6. The following statement shows the receipts and disbursements of the warehouse fund during the year 1901-1902:—

RECEIPTS.	Amount.	Total.	DISBURSEMENTS.		Amount.	Total.
			Rs. A. P.	Rs. A. P.		
To Jute warehouse license fees	23,055 8 0				By contribution to the Fire Brigade	30,557 8 0
Miscellaneous receipts and fines	189 2 0					30,557 8 0
Balance at the commencement of the year	16,866 8 9	23,244 10 0			Balance at the close of the year— Cash in the Bank of Bengal	9,553 10 9
						9,553 10 9
Total	...	40,111 2 9			Total	40,111 2 9

7. Appended is a list of warehouses licensed in 1901-1902.

*List of Warehouses other than Jute licensed in 1901-1902.*

RESOLUTION ON THE ANNUAL REPORT ON THE POLICE ADMINISTRATION OF THE TOWN OF CALCUTTA AND ITS SUBURBS FOR THE YEAR 1901.

RESOLUTION No. 3258J.

POLICE.

*Dated Calcutta, the 29th July 1902.*

READ—

The Annual Report on the Police Administration of the Town of Calcutta and its Suburbs for the year 1901.

Read also—

The Reports for the two previous years and the orders of Government recorded thereon.

In contrast to previous years, the Commissioner of Police, Calcutta, has submitted his Annual Report on the Police Administration in the Town and Suburbs of Calcutta, with excellent punctuality.

2. The office of Commissioner of Police was held from the beginning of the year to 16th April by Mr. A. H. James: on his retirement, Mr. E. M. Showers was appointed to the post, but retired on the 5th September to join a responsible appointment under Government in South Africa. For the remainder of the year Mr. F. L. Halliday, Officiating Deputy Commissioner, acted as Commissioner. The constitution of the force under the Commissioner's control underwent practically no change during the year, and the number of casualties amongst its members, and of punishments inflicted, presents little variation from the figures of preceding years.

3. As regards the working of the force, the number, both of cognizable offences reported and of non-cognizable cases instituted, shows a remarkable decrease in comparison with the figures for the two preceding years 1899 and 1900. Under cognizable offences there were 25,115 cases reported, against 38,353 in 1900 and 34,282 in 1899: the decrease in the matter of the more serious heads of crime, offences against public tranquillity, persons and property calls for little notice, and it is only when the figures under the more unimportant heads, such as 'Public and Local nuisances,' 'Police Act' and 'Cruelty to Animals Act' come to be examined, that the decrease becomes significant. The figures in Statement A, Part III, in the two Reports for 1900 and 1901, show that there were in 1900, 3,571 cases of Public and Local nuisances and 10,037 cases under the Police Act reported by the Police, against 1,852 and 5,809, respectively, in 1901. Similarly, there were in 1901 only 3,602 offences reported under the Cruelty to Animals Act, as compared with 6,780 in 1900.

These figures are of offences reported and not of prosecutions instituted: the percentage of the latter to cases reported, as also of the success of such prosecutions, is much the same in 1901 as in previous years, and calls for no notice.

Though this was not explained in the Report, it has subsequently been elicited that the decrease under 'Public and Local nuisances' is fictitious and due to the non-inclusion by the Chief Presidency Magistrate under this head of 'drunk and disorderly cases,' which have this year for the first time been shown under the Police Act. This departure has made a difference roughly of 2,000 in the cases returned under 'Public and Local nuisances' by the Court in question, and explains the apparent decrease in the Commissioner's Report. The explanation, however, makes the decrease in the figures under the 'Police Act' the more remarkable: there is nothing to show that the number of 'drunk and disorderly' cases in 1901 was less than in 1900, and for the purposes of comparing the Commissioner's figures under the Police Act for the two years, it is necessary to eliminate from the figures for the later year the 2,000 (roughly) cases, which have now been shown there for the first time,

with the remarkable result that the figures under this head fall from 10,037 in 1900 to 3,809 in 1901.

In his Report the Commissioner contents himself with briefly ascribing this noticeable decrease, as well as the little less marked diminution in the 'Cruelty to Animals' cases, to the general strike amongst carters and hackney-carriage drivers, which took place in Calcutta and its Suburbs in June 1901, merely noting that the average of offences reported under 'Public and Local nuisances,' 'Police Act,' and 'Cruelty to Animals' averaged 1,912 per month in the five months preceding the strike, and 731 per month in the seven months which followed it. He has not discussed in the Report how far these significant figures bear out the findings of Government as to the causes which led to this widespread strike, though the desirability of such discussion would appear to be obvious. From subsequent communications, however, with the Commissioner, it appears that as regards the 'Cruelty to Animals' cases, the number sent up by the Police shows little variation from that sent up by them in previous years, and that the decrease noticed is due to the employment by the Calcutta Society for the Prevention of Cruelty to Animals of fewer Agents, and to diminished activity amongst the numbers so reduced since the strike. The reasons for the decrease under this head are therefore to be sought for outside the actual working of the Police, and need not be further examined here.

The case with regard to the falling off of offences under the Police Act is different: the Commissioner of Police attributes the result under this head to the fact that the men under him refrained from making arrests under clauses (3), (6), and (7) of section 66, Act IV of 1868, and the corresponding section in the Suburban Act, in order to minimise the chance of another strike: the sections in question contain provisions against the driving of carts, carriages or vehicles on the wrong side of the road, the leaving of such conveyances without due control, and the obstruction of thoroughfares by such conveyances. The full enquiry into the strike of June 1901 brought out clearly that one of the chief causes which led to it was the habitual blackmailing by the Police of hackney-carriage drivers and cartmen in Calcutta: on the figures now under examination there can thus be set only one of two interpretations; either that the Calcutta Police misused their powers under the Act even more seriously than appeared from the facts and figures before the Committee which enquired into the strike, or that since the strike the Police have neglected to carry out the provisions of the law with regard to the regulation of traffic. It appears that the late Commissioner was of opinion that too much power was given to the rank and file of the Police, and gave them to understand that such cases should be dealt with by officers of the force only. This was, it is stated, one cause of the decrease, another cause was that the Police were unnerved by the punishments inflicted on some of their number, so that they preferred to remain passive spectators of the infringement of the law. It is clear that they failed in the proper performance of their duties either before or after the strike. The Lieutenant-Governor would have been better pleased if the Commissioner's Report had contained some discussion of the facts, and he trusts that with improved supervision the Police will show more consistent work, neither excess of zeal nor neglect of their duties in future.

It is understood that the Commissioner has now under examination the figures for the present year so far as they are available, and in view of the fact that there was within the last month a second, though abortive, attempt at a cart strike in Calcutta, the Lieutenant-Governor trusts that the figures will be very closely scrutinised with a view to seeing that the attempted strike was not the outcome of revived practices of blackmailing on the part of the local Police. In this connection it may be noted that the arrangements which have lately been sanctioned for the better supervision of the control of the cart traffic between the East Indian Railway station at Howrah and the Strand Road should do much to put a final stop to such illegal practices so far as they affect the cartmen who ply within this area.

The large decrease in non-cognizable cases from 27,508 in 1900 to 9,640 in 1901 is almost entirely the result of a diminution under municipal cases from 22,429 to 5,893. This is chiefly the outcome of the changes in procedure

introduced by the new Municipal Act, which did not come into force till April 1900. Under the new Act the professional and license tax, and the tax on carriages and animals are generally realized without recourse to the Courts, and prosecutions are seldom resorted to. Thus in 1900 there were 12,500 license-tax prosecutions, and only 69 in 1901: the figures for 1900 were also swollen by 4,245 cases under the old Act, all such cases being required by the law to be filed before 1st April 1900.

4. Apart from the large decrease in cognizable and non-cognizable offences, there is little in the report to call for notice. The Fire-Brigade did good work, and it is satisfactory to notice that there was no loss of life by fire during the year. The finger-impressions of 1,971 persons charged with offences against property were taken during the year, with the result that in no less than 763 cases the men concerned were identified in the office of the Inspector-General of Police.

5. There were 62 false cases in the Town against 44 in 1900, and 20 in the Suburbs against 29 in 1900. It appears that of the five prosecutions for bringing a false charge decided in the Town, in four a sentence of fine only was passed. The Lieutenant-Governor regrets to find that his remarks last year on the desirability of imposing a deterrent sentence, which a fine can often not be, in such cases have been so disregarded, and trusts he will not have occasion again to call attention to this matter.

6. There has been an increase from 2,979 to 3,321 in the number of fire-arms, rifles, guns and pistols imported, and from 782 to 838 in the number of weapons purchased in India by dealers. During the present year restrictions have, however, been imposed on the importation of rifles, and of Government bore ammunition, as also on the sale and possession of European revolvers and magazine pistols.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Commissioner of Police, Calcutta, for information, and for communication to the Presidency Magistrates.

Ordered that a copy of this Resolution be forwarded to the Commissioner of the Presidency Division, the Chairman of the Corporation of Calcutta, and the Municipal Department of this Government, for information.

Ordered, also, that a copy of the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

*Chief Secy. to the Govt. of Bengal.*

## WEATHER AND CROP REPORT.

*For the week ending on the 28th July 1902.*

**Burdwan.**—Rainfall at Sadar 2·17, Kalna 1·42, Katwa 5·71, Raniganj 1·73. Weather cloudy with occasional showers. Transplantation going on. Fodder and water sufficient. Condition of cattle good. Common rice sells at 12 seers per rupee.

**Birbhum.**—Rainfall at Sadar 2·37, Rampur Hat 4·16. Weather cloudy and rainy. Transplantation going on. Sugarcane promising. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

**Bankura.**—Rainfall at Sadar 5·77, Vishnupur 2·60. Transplantation of paddy going on. More rain is wanted. Sugarcane promising well. No cattle-disease. Fodder and water sufficient everywhere. Common rice sells at 12½ seers per rupee.

**Midnapore.**—Rainfall at Sadar 3·24, Contai 3·32, Tamluk 6·20, Ghatal 5·25. Weather rainy. Transplantation of *aman* going on. Sugarcane doing well. Fodder and water sufficient. State of *bombyx mori* fair at Ghatal. Cattle-pox reported from thana Binpur. Common rice sells as follows:—

	Srs. ch.
Sadar	... 12 8
Contai	... 12 0
Tamluk	... 11 12
Ghatal	... 12 0

} per rupee.

**Hooghly.**—Rainfall at Sadar 3·39, Serampore 2·72, Arambagh 2·97. More rain wanted. State of standing crops good. Common rice sells as follows:—

	Srs. ch.
Sadar	... 10 0
Serampore	... 10 10
Arambagh	... 12 1½

} per rupee.

**Howrah.**—Rainfall at Sadar 4·27, Ulubaria 3·78. Fall general. No more rain wanted for some time. Agricultural prospects fair except in the lowlying lands within the jurisdiction of thana Jagatballavpur and the Ampta basin which have been submerged, and where the crops are under water, and the seedlings are too short to be transplanted. No cattle-disease. Common rice sells at 10½ seers at Sadar and at 11 seers at Ulubaria.

**24-Parganas.**—Rainfall at Sadar 4·78, Barasat 3·11, Basirhat 1·18, Diamond Harbour 2·66. Frequent rain, good monsoon weather. State of standing crops good. Prospect fair. More rain wanted in all subdivisions. Transplantation going on. Common rice sells at 11 seers per rupee. A few cases of cattle-disease reported from thana Basirhat. Supply of fodder and water sufficient.

**Nadia.**—Rainfall at Sadar 2·22, Ranaghat 3·10, Chuadanga 1·89, Meherpur 2·43, Kushtia 1·53. Weather rainy. Prospects of standing crops good. Transplantation of *aman* seedlings going on. Fodder and drinking water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs. ch.
Sadar	... 12 0
Ranaghat	... 11 0
Chuadanga	... 11 0
Meherpur	... 10 8
Kushtia	... 11 4

} per rupee.

**Murshidabad.**—Rainfall at Sadar 3·13, Kandi 2·31, Jangipur 5·01, Lalbagh 9·05. Weather seasonable. Transplantation of *aman* seedlings going on. Prospects of jute, sugarcane and *bhatri* good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs. ch.
Sadar	... 10 12
Kandi	... 12 0
Jangipur	... 11 8

**RESOLUTION REVIEWING THE TRIENNIAL REPORT ON VACCINATION IN BENGAL FOR THE YEARS 1899-1900, 1900-1901 AND 1901-1902.**

MUNICIPAL DEPARTMENT—SANITATION.

*Calcutta, the 30th July 1902.*

RESOLUTION—No. 19628.

READ—

The Triennial Report on Vaccination in Bengal for the years 1899-1900, 1900-1901, and 1901-1902.

Read again—

The Triennial Report on Vaccination in Bengal for the years 1896-97, 1897-98, and 1898-99, and the Resolution recorded by Government thereon.

THE report, which was due to Government on 1st June, was received on 4th July. The delay is unexplained, and is not compensated for by any special merits in the report.

2. There was an increase of operations, as compared with the last triennial period, amounting to 6 per cent. in rural areas and 13 per cent. in municipalities and dispensaries. In Calcutta the increase was 64 per cent. The increase in rural areas and mafassal municipalities would, it is said, have

been greater, if plague had not interfered with the work of vaccination. This cause had clearly no effect in Calcutta, where the plague was worst. A large proportion of the vaccinations in Calcutta, however, are secondary, while the vaccination of infants is known to be in an unsatisfactory state. This has attracted the attention of the Lieutenant-Governor, and measures are being taken by the Corporation to improve it, by providing a better system of registration of births, and by increasing the number of vaccination stations and rendering them more attractive.

3. The average work of a vaccinator has considerably increased during the triennium. In rural areas the increase from 620 to 793 is due to the exclusion of apprentices and the work done by them from the calculation. No explanation is given of the increase of work in Calcutta from 542 cases per vaccinator to 1,013. In the mufassal municipalities the increase from 482 to 569 operations is attributed to the greater activity of the Department owing to the strictures of Government in past Resolutions, but there is room for still further improvement. It is now estimated that, on an average, 1,060 operations are performed by each paid vaccinator, against 944 by licensed agency. The question of the relative merits of the licensed and paid systems is under consideration, and Government reserves its judgment on the subject until the Sanitary Commissioner has reported on it.

4. The increase of vaccination in rural areas and mufassal towns is small, and the Lieutenant-Governor trusts that the wakened interest of Magistrates and Civil Surgeons will be maintained. The increase in the districts of Mymensingh (43,215), Midnapore (35,927), 24-Parganas (33,177) is noticeable, but it is unfortunately due mainly to the prevalence of the severe epidemic of small-pox with which these districts were visited. The explanation given by the Sanitary Commissioner for the fluctuations in different districts is altogether insufficient, when they occur in neighbouring districts as Shahabad (15 per mille) and Gaya (28 per mille). In the former district the number of vaccinations was only 9.76 per mille in 1899-1900, while the average of the Patna Division was 23 per mille. Similar fluctuations are noticeable elsewhere. This point has been repeatedly noticed, and the Lieutenant-Governor regrets to find that Major Dyson has done little or nothing to examine and account for the discrepancies between the returns of different districts or, by personal supervision of the staff, to bring backward districts nearer the level of their neighbours.

5. The Sanitary Commissioner reports an improvement during the triennium in the protection afforded to the infant population. His conclusions are based on an arbitrary ratio of births of 50 per mille instead of the actual estimated figures of the year, viz., 38.57. The latter should be adopted in future. These show that 32.06 per cent. of the infant population was protected. This falls considerably below the average of other Provinces, which according to latest estimates is 45.52, and the question why results should be so indifferent in some districts is not satisfactorily answered. There may be defective classification of ages or greater willingness to bring forward children in some localities than in others, but the effect of these causes should be more closely examined. In Darbhanga 41 per cent. of the infants were vaccinated during the last year against an average of 7.4 per cent. in the years 1896-1899. And similar results are to be noticed in the 24-Parganas, Bankura, and Birbhum. In Muzaffarpur only 10 per cent. of infants were vaccinated against 41 in the neighbouring district of Darbhanga, while in Rangpur the number doubled that of Bogra. If the causes which led to these inequalities were investigated, defects might be removed. The same results are to be seen in towns where vaccination is compulsory. In the Burdwan towns practically all the infants were vaccinated, while in those of Midnapore less than 40 per cent. were protected. The figures in Statement VII, which show the protection afforded to infants in towns, are, however, of doubtful value, and in some cases the number of vaccinations greatly exceed the number of births. Until these points are explained, and it is established that the Vaccination Department and the local officers have done all that is possible, Government cannot consider the suggestion to extend compulsory measures to rural areas.

6. In the Resolution on the last triennial report, a hope was expressed that further experience would enable some conclusion to be based on the

statistics of vaccination as to its effect in reducing the mortality from small-pox. This subject has not been discussed in the present report, and, so far as can be gathered from the diagrams in paragraph 13 and the figures in Statement VI, the results are not encouraging. In Mymensingh there has always been a comparatively large percentage of vaccinations, amounting to over 4 per cent. of the population, but in 1901 the deaths from small-pox considerably exceeded those of other districts in the Division. In Shahabad, where vaccination has been very restricted, the deaths from small-pox have been less than in the neighbouring districts of Patna and Gaya. On the other hand, a comparison of the three districts of the Orissa Division shows that Balasore, where vaccination is normal, has been freer from small-pox than Cuttack and Puri, where it is defective. The percentage of population which is protected is unfortunately so small everywhere that no conclusions are possible from the statistics now available. It will be sufficient in future reports to give one diagram for the last year of the triennial period. The space so saved can be utilised in those explanations of the statistics, and comments upon them, which are so lacking upon the present occasion. The Lieutenant-Governor repeats the remark that more useful and telling work is done in small areas where the vaccination is careful and complete than by vaccination on an apparently much larger scale, where it is only occasional. It is from the former that the most clear and unmistakeable evidence can be given to all around of the protection which vaccination gives.

7. The average cost of vaccination for the period was Rs. 1,86,782, which shows a steady decline on the averages of the two preceding triennia. Of the total amount, a sum of about Rs. 1,30,000 was expended on the cost of supervision and travelling charges, and about Rs. 28,000 on paid vaccinators. The total cost in 1901-1902 to Provincial funds was Rs. 1,44,225. The balance, with the exception of a small payment of Rs. 2,844 made by the Native States of Chota Nagpur, was met from local funds. This is exclusive of the fees paid to the licensed operators.

8. The mortality from small-pox was greater during the triennium than during any period of the past ten years. The epidemic was severest in the Midnapore district and in Orissa. In the report of the Sanitary Commissioner the spread of the disease is attributed to the practice of exposing children to its attack when the small-pox is believed to be mild in character. This practice should be more fully investigated. Vigorous measures were taken to combat the disease, and vaccination increased in the affected districts.

9. The standard of inspection work, both that done by Civil Surgeons and the subordinate inspecting staff, shows a general improvement, but the work done by the Civil Surgeons is very unequal. In Midnapore, where there was a severe outbreak of small-pox, the work of the District Inspector was very defective. There was also a failure in the Sonthal Parganas. Explanations should be submitted. The work done by the Deputy Sanitary Commissioner of the Metropolitan and Eastern Bengal Circle, who inspected only 115 cases, was altogether insufficient.

10. In paragraph 19 of his report the Sanitary Commissioner comments upon the disadvantages under which the Vaccination Department labours in Bengal. The Lieutenant-Governor is disposed to think that the Sanitary Commissioner has exaggerated the unpopularity of vaccination, and adheres to the opinion which he expressed in the Resolution on the report for the last triennium that its advantages are fairly recognized by the people of Bengal, and that such opposition as is encountered is based on a reluctance to pay the fees demanded by the licensed vaccinators. This subject will be more fully examined when the report on the proposal to substitute paid for licensed vaccinators is received.

By order of the Lieutenant-Governor of Bengal,

E. W. COLLIN,  
*Offg. Secretary to the Govt. of Bengal.*

## WEATHER AND CROP REPORT.

*For the week ending on the 4th August 1902.*

**Burdwan.**—Rainfall at Sadar 2·20, Kalna 4·99, Katwa 3·63, Raniganj 3·07. Weather cloudy. Transplantation going on. Fodder and water sufficient. Condition of cattle good. Common rice sells at 12 seers per rupee.

**Birbhum.**—Rainfall at Sadar 6·99, Rampur Hât 5·44. Weather cloudy and rainy. Transplantation vigorously pushed on. Sugarcane promising. Fodder sufficient. Common rice sells at 12 seers per rupee.

**Bankura.**—Rainfall at Sadar 1·98, Vishnupur 5·95. More rain wanted. Transplantation going on. Weather hot. Sugarcane growing well. Fodder and water sufficient. Common rice sells at 12½ seers per rupee.

**Midnapore.**—Rainfall at Sadar 5·54, Contai 7·64, Tamluk 2·22, Ghatal 6·69. Weather rainy. Transplantation of *aman* going on. Agricultural prospects fair. Fodder and water sufficient. Cattle-disease reported from thana Binpur. Common rice sells as follows:—

	Srs.	ch.
Sadar	...	...
Contai	...	...
Tamluk	...	...
Ghatal	...	...
	12	0
	12	0
	11	12
	12	0

per rupee.

**Hooghly.**—Rainfall at Sadar 4·06, Serampore 5·40, Arambagh 4·38. State of standing crops good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.
Sadar	...	...
Serampore	...	...
Arambagh	...	...
	10	0
	10	9
	12	0

per rupee.

**Howrah.**—Rainfall at Sadar 5·50, Ulubaria 2·90. Fall general. No more rain wanted. Transplantation of *aman* paddy going on briskly, except on lowlying lands which are still under water, though they are being satisfactorily drained by khals. Agricultural prospects are hopeful. No cattle-disease. Fodder and water sufficient. Common rice sells at both Sadar and Ulubaria at 11 seers per rupee.

**24-Parganas.**—Rainfall at Sadar 4·76, Barasat 4·45, Basirhat 4·15, Diamond Harbour 1·29. Heavy rain except in the south. State of standing crops good, but more rain still wanted. Prospect fair. *Aus* and jute sown in normal area, but growth retarded considerably for want of rain. Transplantation of *aman* retarded for the same reason, its extent on 1st being—Sadar 37·5 per cent., Barasat 75 per cent., Basirhat 35 per cent., Diamond Harbour 62·5 per cent. Transplantation of *aman* continues: jute and *aus* being harvested in Barasat and Basirhat. Common rice sells at 11 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.

**Nadia.**—Rainfall at Sadar 4·05, Ranaghat 4·83, Chuadanga 3·78, Meherpur 2·29, Kushtia 2·98. Transplantation of *aman* in progress. Harvesting of *aus* commenced. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.

**Khulna.**—Rainfall at Sadar 3·93, Bagerhat 4·65, Satkhira 6·21. Weather seasonable. Transplantation of *aman* and harvesting of *aus* continue. Prospects of *aus* fair. Fodder and water sufficient. Cattle-disease reported from Asasuni. Common rice sells as follows:—

	Srs.	ch.
Sadar	...	...
Bagerhat	...	...
Satkhira	...	...

per rupee.  
11 5 }  
12 8 }  
10 8 }

**Rajshahi.**—Rainfall at Sadar 6·01, Nator 2·05, Naugaon 1·10. Weather seasonable. Harvesting of *aus* and transplantation of winter rice continues. Prospects of crops good. Condition of cattle good. Common rice sells at 12 seers per rupee.

**Dinajpur.**—Rainfall at Sadar 2·10. Fall in the district general, varying from 1·59 to 4·61. Weather seasonable. Standing crops good. Steeping of jute has commenced. Transplanting of winter rice is in full swing. No cattle-disease. Fodder and drinking-water plentiful. Rice selling at 12 seers per rupee.

**Jalpaiguri.**—Rainfall at Sadar 4·05, Alipore Duars 2·77. Weather cloudy and hot. Transplantation of *haimanti* and harvesting of *bhadoi* paddy going on. Prospect of *haimanti* paddy favourable, that of *bhadoi* not so favourable. Common rice sells at 11½ seers a rupee. Fodder and water sufficient. Cattle-disease reported from three thanas in Sadar subdivision.

**Darjeeling.**—Rainfall at Sadar 6·52, Kurseong 13·51, Siliguri 11·48. Weather seasonable. Hills—*Haimanti dhan* being cultivated. Maize, *chota marua* and *bhadoi dhan* doing well. Terai—*Haimanti* paddy being transplanted. Prospects good. Coarse rice sells as follows:—

	Srs.	ch.
Hills	...	...
Terai	...	...

per rupee.  
8 0 }  
11 0 }

Maize sells at Darjeeling and Kalimpong at 18 seers per rupee.

**Rangpur.**—Rainfall at Sadar 2·24. Fall general. Weather cloudy and rainy. Cutting of *aus* and jute and transplantation of *aman* going on low lands. Jute a little damaged in Nilphamari by rain. Cattle-disease still prevails in Gaibanda. Common rice sells at 11 seers per rupee.

**Bogra.**—Rainfall at Sadar 1·12. Fall general. Weather hot and cloudy. Cutting of *aus* and jute and transplantation of *aman* going on. Prospects good. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

**Pabna.**—Rainfall at Sadar 1·32, Sirajganj 1·09. Fall general. Weather cloudy and rainy. *Aus* and jute are being reaped. Prospects of standing crops fair. Fodder and water sufficient. Cattle-pox at certain places. Common rice sells at 10 seers per rupee.

**Dacca.**—Rainfall at Sadar 1·61, Manikganj 3·89, Munshiganj 1·54, Narayanganj 1·64. Prospects of crops fair. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

**Mymensingh.**—Rainfall at Sadar 0·75, Jamalpur 0·32, Kishorganj 0·69, Netrokona 5·55, Tangail 1·36. Weather seasonable. Harvesting of *aus* and jute and transplantation of winter rice continue. Jute have suffered from excess of rain and outturn will probably not exceed 50 per cent. Fodder sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.
Sadar	...	...
Kishorganj	...	...
Jamalpur	...	...
Netrokona	...	...
Tangail	...	...

per rupee.

**Faridpur.**—Rainfall at Sadar 3·31, Goalundo 1·37, Madaripur 3·88. Weather seasonable. State and prospects of standing crops good generally. Fodder sufficient. Common rice sells at 11 seers per rupee.

**Backergunge.**—Rainfall at Sadar 6·61. Fall general, lightest at Pirojpur, 4·11. Weather seasonable. Transplantation of *aman* going on. Cattle-disease at Kotwali. Matbari and Barmuddin thanas. Fodder and water sufficient. Common rice sells at 11 seers per rupee.

**Tippera.**—Rainfall at Sadar 1·30, Brahmanbaria 1·60, Chandpur 96. Weather seasonable. Harvesting of *aus* and jute in progress. Flood has caused slight damage to paddy in Brahmanbaria. Fodder and water sufficient. Cattle-disease reported from Matlab thana. Common rice sells at 12 seers per rupee.

**Noakhali.**—Rainfall at Sadar 10·55, Feni 8·27. Fall general. Weather seasonable. Transplantation of *aman* continues. Prospects of *aus* fair. Cattle-disease reported from one thana. Fodder and water sufficient. Condition of cocoon good. Common rice sells at Sadar at 11 seers and at Feni at 13 seers per rupee.

**Chittagong.**—Rainfall at Sadar 1·14, Cox's Bazar 13·41. Transplantation of *aman* crops going on. Fodder and water sufficient. Cattle-disease still reported in parts of the district. Rice sells at 12½ seers per rupee.

**Chittagong Hill Tracts.**—Rainfall at Sadar 2·96. Fall general. Weather alternately fine and showery. Winter rice sowing continues. *Joom* crops progressing. Common rice selling at 12 seers. No cattle-disease.

**Patna.**—Rainfall at Sadar 0·85, Barh 2·37, Bihar 1·91, Dinapore 2·3, Hilsa 1·53, Bikram 2·95. Weather hot and cloudy. Paddy transplantation progressing. More rain wanted. *Bhadoi* slightly damaged. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs. ch.
Patna	11 4
Barh	11 8
Bihar	10 0
Dinapore	11 12

per rupee.

**Gaya.**—Rainfall at Sadar 3·10, Nawadah 2·71, Jahanabad 4·04, Aurangabad 6·32. Weather rainy. Transplantation of paddy commenced. *Bhadoi* and sugarcane doing well. No cattle-disease. Fodder and water ample. Average price of common rice 10 seers 5 chitaks per rupee.

**Shahabad.**—Rainfall at Sadar 6·20, Buxar 2·34, Bhabhua 2·89, Sasaram 19·98, Dehri 6·44. Weather seasonable. Paddy transplantation commenced. *Bhadoi* and sugarcane doing well. Fodder and water sufficient. No cattle-disease. Rice sells at Sadar at 11 seers a rupee.

**Saran.**—Rainfall at Sadar 1·16, Siwan 2·49, Gopalganj 1·75. Weather seasonable. Weeding of *bhadoi* and transplantation of paddy going on. Fodder and water sufficient. Sporadic cases of cattle-disease reported from Parsa and Garkha. Common rice sells at Sadar at 12 seers per rupee.

**Champaran.**—Rainfall at Sadar 1·33, Bettiah 97. Weather bright and hot. Standing crops doing well. Transplantation of *aghani* paddy and weeding of *bhadoi* crops going on. No cattle-disease. Fodder and water sufficient. Common rice sells at 12½ seers and maize at 22 seers per rupee.

**Muzaffarpur.**—Rainfall at Sadar 2·17, Hajipur 0·94, Sitamarhi 0·24. Weather generally cloudy. Transplantation of paddy continues. Prospects of crops good. Fodder and water sufficient. Very few cases of cattle-disease in Sitamarhi subdivision. Prices are—Common rice 11½ seers and maize 20 seers a rupee.

**Darbhanga.**—Rainfall at Sadar 1·13, Samastipur 4·53, Madhubani 2·30. Weather hot and cloudy. Transplantation of paddy in progress. *Bhadoi* being weeded. Prospects of standing crops good. Fodder and water sufficient. Cattle-disease is reported from Warisnagar, Phulpars and Jalle police-stations. Common rice sells as follows:—

	Srs. ch.
Sadar	12 0
Samastipur	12 8
Madhubani	11 11

per rupee.

**Monghyr.**—Rainfall at Sadar 4·00, Begusarai 4·08, Jamui 3·10. Weather seasonable. Transplantation of *marua* and paddy going on. *Bhadoi* crops promising. Fodder and water sufficient. A few cases of cattle-disease reported from Begusarai thana. Common rice sells as follows:—

	Srs. ch.
Sadar	11 4
Begusarai	11 0
Jamui	11 0

per rupee.

**Bhagalpur.**—Rainfall at Sadar 2·34, Banka 3·14, Madhipura 3·51, Supaul 3·98. Weather seasonable. Prospects good everywhere. Recent rainfalls have done immense

SUPPLEMENT TO THE CALCUTTA GAZETTE, AUGUST 6, 1902. 1127

good. Transplantation of paddy briskly going on. Sporadic cases of cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

				Srs. ch.
Sadar	...	...	...	11 6
Banka	...	...	...	11 14
Madhipura	...	...	...	13 0
Supaul	...	...	...	13 0

per rupee.

Purnea.—Rainfall at Sadar 1·35, Kishanganj 5·47, Araria 2·36. Fall general and good except at Sadar, where more rain is wanted. Prospects on the whole good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

				Srs. ch.
Sadar	...	...	...	10 0
Kishanganj	...	...	...	11 0
Araria	...	...	...	11 8

per rupee.

Malda.—Rainfall at Sadar 2·99, Sibganj 3·73, Gajol 1·87. Weather hot with occasional rain. Harvesting of *bhadoi* in progress. Transplantation of winter rice estimated at 50 per cent. Cutting of jute commenced in places. Prospects good. No cattle-disease. Fodder and water sufficient except in parts of old Malda thana. Common rice sells at 11 seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 3·70, Deoghur 4·26, Godda 5·37, Jamtara 4·79, Pakaur 3·99, Rajmahal 1·16. Weather hot and cloudy with occasional showers. Transplantation of winter rice is going on. Prospects of standing crops favourable. Fodder and water sufficient. Common rice sells in Sadar at 11½ seers per rupee. No cattle-disease.

Cuttack.—Rainfall at Sadar 3·48. Fall general. Weather of usual monsoon character. Harrowing of *beali* and reploughing and transplantation of *sarad* in progress. *Beali* in ears in parts. Prospects good. No cattle-disease. Fodder and water sufficient. Common rice sells at 13 seers 2 chitaks at Sadar.

Balasore.—Rainfall at Sadar 4·20. Fall general. Weeding and transplantation continue. Prospects good. Sugarcane, oilseeds, jute and cotton thriving. Rice sells at 13 and 15 seers per rupee at Sadar and Bhadrak respectively. Fodder and water ample. No cattle-disease. No damage by flood reported so far, but possibly Bograi pargana has suffered somewhat.

Angul.—Rainfall at Sadar 4·77, Chhendipada 4·22, Bissipara 4·99. Weather cloudy. Puddling and transplantation going on. Common rice sells at 12 and 11½ seers at Sadar and Khondmals respectively.

Puri.—Rainfall at Sadar 2·22, Khurda 4·03. Weather seasonable. Rainfall throughout the district. *Bhadoi* and *laghu sarad* paddy in good progress. Sugarcane and cotton growing well. Fodder and water-supply sufficient. Cattle-disease reported from all parts of district. Rice sells at 14 seers 7 chitaks per rupee.

Hazaribagh.—Rainfall at Sadar 3·38, Giridih 5·03. Fall general. Weather seasonable. Transplanting of paddy going on. Sugarcane doing well. Fodder and water sufficient. Common rice sells at 11½ seers per rupee.

Ranchi.—Rainfall at Sadar 1·21. Fall general. Weather seasonable. Prospects of crops good. Transplantation of paddy in progress. Cattle-disease reported from several thanas. Fodder and water sufficient. Common rice sells at 14 seers per rupee.

Palamu.—Rainfall at Sadar 0·32. Rainfall general. Weather seasonable. Transplantation of *muruia* still continues. *Bhadoi* paddy being sown. Paddy transplantation commenced in places. Standing crops are good. Fodder and water sufficient. Price of rice at Sadar is 10 seers 2 chitaks per rupee.

Manbhum.—Rainfall at Sadar 2·92, Gobindpur 2·73. Weather seasonable. Prospects of standing crops good. Transplantation of winter rice still in progress. Fodder and water sufficient. Cattle-disease reported from thana Topchanchi. Average price of common rice is at Sadar 11½ seers and at Gobindpur 10 seers 14 chitaks per rupee.

Chaibassa.—Rainfall 1·51. Transplantation in progress. Young paddy promising. Average price of rice is 13½ seers in the district; at Chaibassa 11 seers per rupee.

General Summary.—The rainfall during the week was general and at places heavy. More rain is still needed in the districts of Bankura, 24-Parganas and Patna. Transplantation of winter rice and harvesting of early rice and jute continue. Autumn crops and sugarcane doing well. Prospects fair. Cattle disease reported from 16 districts. No want of fodder or water. The price of common rice has risen in 7 districts, fallen in 13, and is stationary in the rest (27).

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,  
Offg. Secretary to the Govt. of Bengal.

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	... ... ...	%	87
The total fall of rain from 27th July to 2nd August 1902	... ... ...	Inches.	4·99
The average fall of the corresponding period for 24 years, Surveyor-General's Office	... ... ...	Inches.	39·30
The total fall from 1st January to 2nd August 1902	... ... ...	Inches.	3·85
The average fall of the corresponding period for 24 years, Surveyor-General's Office	... ... ...	Inches.	35·75

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; t, thunder; d, drizzling rain; z, lightning; p, passing temporary showers.

N.B.—In the weekly report from 20th to 26th July 1902, read  $133\cdot4$  for  $125\cdot2$  as maximum in sun of the 20th July 1902.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,  
Alipore (Calcutta), the 4th August 1902.

G. W. KÜCHLER  
for Meteorological Reporter to the Govt. of India,  
and Director-General of Indian Observatories.

**RESOLUTION ON THE ANNUAL REPORT OF THE CIVIL VETERINARY  
DEPARTMENT, BENGAL, AND OF THE BENGAL VETERINARY  
COLLEGE.**

REVENUE DEPARTMENT—AGRICULTURE

Calcutta, the 11th August 1900

**RESOLUTION—No. 3122**

P-14B

The Annual Report of the Civil Veterinary Department, Bengal, for the year 1901-1902 and of the Bengal Veterinary College.

Read also—

Letter No. 101T.A., dated 3rd July 1902, from the Director of the Department of Land Records and Agriculture, Bengal, submitting the above report with his remarks.

The Annual Report of the Civil Veterinary Department and of the Bengal Veterinary College has this year been considerably curtailed, and is comprised, together with its appendices, within the prescribed limits of 15.

together with its appendices, within the prescribed limits of 15 pages.

2. *Veterinary Dispensaries*.—The year under review was marked by an important increase in the number of veterinary dispensaries from twelve to nineteen; and the number of patients treated, viz., 737 in-patients and 8,892 out-patients, was more than double that of the preceding year. The Lieutenant-Governor has read with pleasure the good accounts given of the veterinary dispensaries at Howrah, Gaya, Sitamarhi, Darbhanga, Patna, Balasore, Dumraon, Muzaffarpur, and Chittagong, and he notices that at Monghyr the new dispensary building has been built entirely from funds raised by public subscription.

Government in its Resolution No. 4051, dated 10th December 1901, has undertaken on certain conditions to contribute one-half of the expenses incurred by District Boards in the maintenance of veterinary dispensaries and one-sixth in the case of dispensaries maintained jointly by District Boards and Municipalities. The application from the Cuttack Dispensary for assistance is under consideration.

3. *Epidemic Disease.*—The Government of India in commenting on last year's report expressed the fear that glanders is very rife in Calcutta, and stated that they trusted that measures to check this disease would shortly be brought into force. The figures available support the conclusion that glanders and farcy are prevalent both in Calcutta and in the districts. Altogether at the instance of public officers 51 horses were destroyed on account of this disease last year. It has been reported to the Government of India that the introduction of Act XIII of 1889 into Calcutta in supersession of Act VIII (B. C.) of 1880 will involve an annual expenditure of Rs. 10,000 with a probable increase in the near future, and that therefore on financial grounds its introduction must await the next revision of the Provincial contract.

The year under review showed a marked decrease in reported cattle-disease; but rinderpest was again rife in Birbhum, and there were severe outbreaks in Khulna, Gaya, and Hazaribagh, where the number of cattle attacked exceeded 2,000 in each district. In Murshidabad, Chittagong, Shahabad, Palamau, and Manbhum over 1,000 cases were reported in each district. The Veterinary Assistants were able to immunise 12,829 head of cattle during the year, and could have done more work under this head if more serum had been available. It is satisfactory that there was no friction between the operators and the owners of cattle.

Under recent orders from the Government of India instruction in rinderpest inoculation will in future be imparted to veterinary assistants at Muktesar and Bareilly. It has accordingly been arranged to send this year four assistants monthly for instruction until 24 have been trained.

4. *Improvement of stock.*—It is trusted that the attempt made by the importation by the Civil Veterinary Department and by the District Board of Patna of Australian cows and bulls to improve the Patna breed of milch cattle may be successful. Of the animals imported by the Veterinary Department, two unfortunately died soon after their arrival.

5. *The Veterinary College.*—The session opened with 47 students in the three classes, of whom 5 were Muhammadans. Withdrawal and removal reduced the total number to 35. The results of the examination at the end of the year were creditable both to the students and the lecturers. All the students in the three classes held stipends provided either by Government or District Boards and Municipalities or private individuals. Since the close of the year the rules for admission to the College have been revised, and the curriculum of studies modified on the lines suggested by the Umballa Veterinary Conference of 1900.

6. *The Belgachia Infirmary.*—There was a decrease in the number of in-patients and out-patients in the Belgachia Infirmary, which has not been explained either by the Superintendent or by the Director of Land Records. The fees for admission have, however, been recently reduced in the case of horses and ponies belonging to persons of small means and hackney-carriage drivers, and the fee charged to cartmen, *goalas*, and pack-bullock drivers for the treatment of their cattle has been reduced by one-half. This should improve the use of the institution.

7. *Financial.*—The cost of maintaining the Department exceeded that of last year by about Rs. 11,000. This was chiefly due to increased establishment, increased travelling of the Inspectors, increased rent of land, charges on account of fencing the College grounds, and purchase of models and specimens.

8. The Lieutenant-Governor has pleasure in acknowledging the zeal and success with which Veterinary Major Raymond managed the Department during the year.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,  
Offg. Secretary to the Govt. of Bengal.

SUPPLEMENT TO THE CALCUTTA GAZETTE, AUGUST 13, 1902. 1147

**LIBERALITY OF MAHANTA SUMERU GIRI GOSSAIN, OF MAHIGUNGE.**

No. 2197 Medl., dated Calcutta, the 11th August 1902.

From—E. W. COLLIN, Esq., Offg. Secy. to the Govt. of Bengal, Municipal Dept.,  
To—The Commissioner of the Rajshahi Division.

WITH reference to your endorsements noted in the margin, forwarding  
No. 628, dated 27th February 1902. copies of the letters from the Magistrate of  
" 354J.Ct., dated 17th June " Rangpur, in which he reports that Mahanta  
" 496J.Ct., dated 14th July " Sumeru Giri Gossain, of Mahigunge, has given  
" 187J., dated 28th July " the sum of Rs. 3,000, to be spent on construct-  
ing a pauper ward for the new dispensary at Nowabgunge, in the town of  
Rangpur, I am directed to request that you will be so good as to convey  
the thanks of Government to the donor for his public spirit and liberality.

2. This letter will be published in the *Calcutta Gazette*.

## WEATHER AND CROP REPORT.

*For the week ending on the 11th August 1902.*

**Burdwan.**—Rainfall at Sadar 1·27, Kalna 0·29, Katwa 0·10, Raniganj 0·97. Weather cloudy. Transplantation going on. Fodder and water sufficient. No cattle-disease. Common rice sells at 11 seers per rupee.

**Birbhum.**—Rainfall at Sadar 2·94, Rampur Hât 3·52. Transplantation going on. Sugarcane promising. Weather cloudy and raining. Fodder sufficient. Common rice sells at 12 seers per rupee.

**Bankura.**—Rainfall at Sadar .61. More rain wanted. Transplantation going on. Weather hot and cloudy. Sugarcane doing well. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

**Midnapore.**—Rainfall at Sadar 2·63, Contai 2·17, Tamluk 3·08, Ghatal 1·41. Weather hot and raining. Transplantation of *aman* continues. Agricultural prospects good. Fodder and water sufficient. Cattle-disease reported from Binpur. Common rice sells as follows:—

	Srs. ch.
Sadar	... 12 0
Contai	... 11 14
Tamluk	... 11 12
Ghatal	... 12 0 } per rupee.

**Hooghly.**—Rainfall at Sadar 0·77, Serampore 1·26, Arambagh 0·34. Transplantation of *aman* continues. Fodder and water sufficient. Common rice sells as follows:—

	Srs. ch.
Sadar	... 10 0
Serampore	... 10 5
Arambagh	... 11 12 } per rupee.

**Howrah.**—Rainfall at Sadar 2·64, Ulubaria 2·48. Fall recorded on all days of the week except on 6th at Ulubaria, the 5th to 7th at Sadar. The rain has done no harm. Transplantation of *aman* going on briskly. Agricultural prospects hopeful. Fodder and water-supply sufficient. Common rice sells at both Sadar and Ulubaria at 11 seers per rupee.

**24-Parganas.**—Rainfall at Sadar 2·97, Barasat 4·69, Basirhat 1·11, Diamond Harbour 1·76. Weather seasonable. State of standing crops good, but more rain still wanted. Prospects fair. *Aus* and jute being harvested. Transplantation of *aman* continues. Common rice sells at 11½ seers per rupee; at 10½ seers in Diamond Harbour. A few cases of cattle-disease reported from Basirhat. Supply of fodder and water sufficient.

**Nadia.**—Rainfall at Sadar 2·70, Ranaghat 0·75, Meherpur 2·20, Chuadanga 1·44, Kushtia 0·71. Harvesting of *aus* paddy and transplantation of *aman* paddy going on. Juta being steeped. Fodder and drinking water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs. ch.
Sadar	... 12 0
Ranaghat	... 11 0
Chuadanga	Report not received } per rupee.

		Miles.	
The mean movement of the wind per day	... ...	132·3	
The greatest movement of the wind in one day	... ...	271·0	22nd
The greatest movement of the wind in one hour	... ...	17·0	22nd 1 to 2 p.m.
The number of hours with winds from each of the eight points—N. 15, N.E. 37, E. 57, S.E. 151, S. 220, S.W. 184, W. 39, N.W. 9, Calm 32.			

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore .003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6 higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.
